

5 Elements of HazCom Compliance

Manage with Chemscape's mobile software and expertise.

1 Chemical Inventory

Employers need to keep a physical inventory of chemicals. Chemscape stores and prints a record of your chemicals by location.

2 Safety Data Sheets

An up-to-date SDS for each chemical needs to be accessible to employees. Chemscape stores your SDSs and keeps them up-to-date. Worker's access SDSs 24/7 from phone, tablet or laptop.

3 Labels

All containers of hazardous materials need to be labeled. Chemscape creates labels to replace damaged labels or to label portable or temporary containers.

4 Written Plan

A written plan needs to be created if chemicals are produced or handled at your worksite. Chemscape can publish unlimited HazCom Plans for your business.

5 Employee Training

Employees who handle hazardous materials in the workplace need HazCom training. Chemscape offers an online HazCom course to get employees certified with chemical safety education.

Reduce chemical liability and make an impact on your business with Chemscape's Chemical Compliance tool.
